BIODIVERSITY POLICY

Ayfleks Packaging recognises that the decline in biodiversity may have an adverse impact on all ecosystems at a global scale, and is committed to preserving biodiversity in the interest of protecting environmental balance and ecosystems. The company continues to pursue its operations with a view to safeguarding biodiversity and ensuring environmental sustainability.

In this context, we commit to:

- Supporting the authenticity and diversity of natural habitats.
- Assessing the impact of our operations on biodiversity and developing biodiversity action plans.
- Working to apply a preventive approach in new projects in order to minimise impacts on biodiversity.
- Developing practices across all current and ongoing projects within our group companies that give due consideration to the protection of endangered and threatened species.
- Reviewing the current situation in biodiversity conservation efforts and working in close collaboration with relevant regulatory authorities, scientists, and local administrations, acting jointly with stakeholders on local solutions and global impacts.
- Taking into account the Equator Principles, IFC (International Finance Corporation) Performance Standards, and/or EBRD (European Bank for Reconstruction and Development) Performance Requirements when assessing biodiversity risks associated with large-scale investments that may give rise to environmental and social risks.
- Assigning a significant place to biodiversity within our sustainability objectives and incorporating it into our decision-making processes.
- Encouraging all employees and stakeholders to actively participate in biodiversity conservation efforts.
