

ENVIRONMENTAL POLICY

At Ayfleks Ambalaj, while meeting the needs and expectations of our consumers and customers, we are committed to making continuous improvements to our environmental performance across all our activities, and to conducting our business in an environmentally responsible and sustainable manner. Our approach is grounded in the principle of sustainable development: to meet the needs and expectations of today without compromising the ability of future generations to meet their own. We take all necessary measures to minimise the adverse environmental impacts of our operations. Enhancing our positive contributions to the environment is an integral part of how we do business. In line with this commitment, we implement the requirements of our Environmental Management System, review the system periodically, and strive to continuously improve our environmental performance. To this end:

- We commit to full compliance with all applicable environmental legislation and sector-specific regulations.
- Recognising that many natural resources are non-renewable, we take the necessary measures to promote their efficient use and aim to minimise resource consumption at source.
- When developing projects related to our products and processes, we take environmental impacts into account and endeavour to prevent pollution at source.
- In the event of any accident or emergency arising from our operations, we plan and implement measures to reduce environmental damage to the lowest possible level.
- We raise awareness among all our employees on environmental matters and provide training to foster a sense of individual responsibility.
- We take measures to reduce the waste generated by our operations, seek opportunities for reuse and recovery, and implement a zero-waste policy.
- In fulfilment of our social responsibility, we sustain our environmental activities effectively and consistently.
- All environmental initiatives are approached within the framework of continuous improvement.
- We work collaboratively with all our stakeholders to raise environmental awareness, enhance knowledge, and share best practices.
- We ensure that all company employees receive the training and resources necessary to understand and implement our environmental policy and their associated responsibilities.
